## 5. HOW TO USE:

### Place Rock Bait Station in the following places:

- Green areas, where the presence of overgrown grass is particularly appreciated by rodents;
- Near gardens, green houses and grasslands;
- Along the external perimeter of food industries;
- Inside storehouses;
- In the back of supermarkets;
- In waste collection areas.

The special shape and colour of the trap make it perfectly adaptable to the environment.

We suggest you to give a number to each trap and indicate its placement in the monitored area plan, in order to facilitate the check during the periodic monitoring.

**Theoretical covered area:** at a distance of 5-10 meters the one from the other, according to the assumed pest infestation.

**Suggested monitoring period:** all the year long, especially in the period between October and April, in which it is registered peaks due to the external temperature reduction.

**Suggested frequency of the controls:** weekly. Change or clean the trap according to the pest infestation.

The use of the trap in damp and dusty places does not reduce the product functionality over time.

**Storage conditions:** in a cool and dry room, temperature below 25°C and R.H. below 55%.  
If well stored (intact packaging), the product shelf life is 3 years.

## 6. PACKAGING AND SPARE PARTS:

Packs: bulk

Case: 12 pieces (sales unit)

Pallet: 240 pc/pallet; 20 cases/pallet; pallet dimension: 80 x 120 x 175 cm (h)

## 7. DISPOSAL CONSIDERATIONS:

Waste disposal should be in accordance with existing Community , National and local regulations.
