

Safety Information Sheet

In accordance with Regulation (EC) n. 1907/2006 Art. 32

1	Trade Name:	MOSQUITOREX		
	Description/Application:	Ready-to-use liquid with physical-mechanical action for the control of mosquito larvae.		
	Supplier information:	NEWPHARM S.r.l. Via Tremarende, 22 35010 S. Giustina in Colle (PD) Tel. +39 049 9302876 Fax +39 049 9320087 sds@newpharm.it		
2	Hazard identification:	The product is not to be considered dangerous in accordance with Regulation (EC) No. 1272/2008 (CLP).		
3	Composition and components information:	The product does not contain any substance classified as dangerous for health or for the environment in such quantities as to require a declaration according to the provisions of the Regulation (EU) 1272/2008 (CLP) and subsequent amendments, or those substances for which an exposure limit in the workplace has been assigned. <u>Substances subject to authorization:</u> none. <u>Substances subject to restriction:</u> none.		
4	First aid:	In case of inhalation:	In case of inhalation of large quantities, remove victim to fresh air and keep at rest in a position comfortable for breathing.	
		In case of skin contact:	Rinse thoroughly with soap and water. Wash the contaminated clothing before using it again.	
		In case of eye contact:	Rinse under running water for several minutes keeping your eyes open. Remove contact lenses, if present.	
		In case of ingestion:	Immediately rinse mouth with water. Not induce vomiting. Never give oral fluid if the person is unconscious.	
		If you have any doubts or persistent symptoms, consult a doctor. In case of suspected intoxication, consult a Poison Control Center. Always keep the product label available.		
5	Fire prevention measures:	Non-flammable or explosive product.		
		In case of fire, use appropriate fire extinguishing methods:		
		Appropriate means:	Water spray, carbon dioxide, extinguishing powder, foam.	
		Non-appropriate means:	-	
During combustion, potentially noxious fumes may be produced (e.g., CO, CO ₂).				
6	Accidental release measures:	Contain the leakage with absorbing material (small quantities) or with mechanically vacuum (large quantities) and dispose of the residues in compliance with current regulations. If it does occur an event leading to environmental pollution, immediately inform the relevant authority.		
7	Handling and storage:	Comply with general hygiene standards. Do not eat, drink, or smoke during the application. Keep away from food, feed. Keep the product in its original packaging, closed, away from direct light, in a cool and dry place. Avoid all sources of ignition: heat, sparks, and open flames. Storage temperature: -5 °C - 30 °C Below the indicated temperature limits, the properties of the product undergo variations. The alteration of the properties is reversible by mixing and heating.		
8	Individual protection:	Individual protection measures, such as personal protective equipment, are not necessary for normal use. If conditions differ from normal or work is carried out under extreme conditions, an expert's advice is necessary before deciding upon further protective measures.		
9	Physical-chemical properties:	Features: Liquid Color: Colourless	Smell: Odorless Solubility: Insoluble	Explosive properties: Non-explosive Oxidising properties: Non-oxidizing
10	Stability and reactivity:	Stable under normal conditions of use and storage. No substances to avoid.		
11	Toxicology information:	Information about the blend is not available.		
12	Ecotoxicological information:	The product does not contain substances meeting PBT or vPvB criteria.		
13	Disposal:	Do not reuse the empty containers. Dispose of the container in accordance with local and national regulations.		
14	Transport Information:	Non-dangerous product in accordance with transport regulation.
